

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1. (Currently Amended) A printing device comprising:

a printing job receiving unit for receiving a printing job, wherein the printing job includes (a) a single default setup command for modifying multiple items of a default setup for the printing device, (b) a print condition instruction used for executing the printing job, and (c) test print image data and a command;

a command analyzing unit for analyzing whether the received printing job includes the single default setup command ~~the command included in said printing job;~~

a default setup modifying unit for modifying the multiple items of [[a]] the default setup to a modified multiple items of the default setup based on the single default setup ~~a default setup modifying command when the single default setup~~ **[[said]]** ~~command is said default setup modifying command; and~~ included in the printing job; and

a printing unit for printing the test print image data included in **[[said]]** the printing job ~~according to the modified default setup.~~

2. (Cancelled)

3. (Cancelled)

4. (Currently Amended) A printing job transmission device comprising:
a default setup inputting unit for inputting multiple items of a default setup for
~~[[a]]~~ the printing device;
a printing job preparation unit for preparing a printing job including (a) a single
default setup command used for modifying multiple items of the default setup for the
printing device to multiple contents entered by the default setup inputting unit, (b) a
print condition instruction used for executing the printing job, and (c) test print image
data; ~~test print image data and a default setup modifying command for modifying the~~
~~default setup of said printing device to a modified default setup entered by said~~
~~default setup input unit; and~~
a printing job transmission unit for transmitting ~~[[said]]~~ the printing job to
~~[[said]]~~ the printing devicee unit.

5. (Currently Amended) A printing system method comprising:
receiving a printing job, wherein the printing job includes (a) a single default
setup command used for modifying multiple items of a default setup for the printing
device, (b) a print condition instruction used for executing the printing job, and (c)
test print image data;
analyzing whether the received printing job includes the single default setup
command;
modifying the multiple items of the default setup to a modified multiple items
of the default setup based on the single default setup command when the single
default setup command is included in the printing job; and

printing the test print image data included in the printing job

~~a printing device and a printing job transmission device, which are connected so as to communicate with each other; wherein,~~

~~said printing job transmission device comprising:~~

~~a default setup inputting unit for inputting a default setup for said printing device;~~

~~a printing job preparation unit for preparing a printing job including test print image data and a default setup modifying command for modifying the default setup of said printing device to a modified default setup entered by said default setup input unit; and~~

~~a printing job transmission unit for transmitting said printing job to said printing device; and~~

~~said printing device comprising:~~

~~a printing job receiving unit for receiving a printing job including the test print image data and a command;~~

~~a command analyzing unit for analyzing the command included in said printing job;~~

~~a default setup modifying unit for modifying a default setup to the modified default setup based on a default setup modifying command when said command is said default setup modifying command; and~~

~~a printing unit for printing the test print image data included in said printing job according to the modified default setup.~~

6. (Cancelled).

7. (Currently Amended) The printing ~~system~~ method claimed in claim 5 ~~[[or 6]], wherein [[said]] the printing [[unit]] step of said printing device additionally~~ prints the contents of the default setup modified by said default setup modifying unit.

8. (Currently Amended) A printing ~~method~~ job transmission device comprising:

a default setup inputting unit for inputting multiple items of a default setup for the printing device;

a printing job preparation unit for preparing a printing job including (a) a single default setup command used for modifying multiple items of the default setup for the printing device to multiple contents entered by the default setup inputting unit, (b) a print condition instruction used for executing the printing job, and (c) test print image data

~~receiving a printing job including test print image data and a command;~~

~~analyzing the command included in said printing job;~~

~~modifying a default setup to a modified default setup based on a default setup modifying command when said command is said default setup modifying command;~~
and

~~printing the test print image data included in said printing job according to the modified default setup.~~

9. (Cancelled).

10. (Currently Amended) The printing ~~method~~ system claimed in claim ~~[[8]]~~ 9, wherein ~~[[said]]~~ the printing device prints the test print image data according to the modified default setup ~~step prints the contents of the default setup modified by said default setup modifying step.~~

11. (Currently Amended) ~~[[A]]~~ The printing system claimed in claim 9, wherein the printing unit of the printing device prints additionally the contents of the default setup modified by said default setup modifying unit ~~job transmission method~~ comprising:

~~inputting a default setup for a printing device;~~
~~preparing a printing job including test print image data and a default setup~~
~~modifying command for modifying the default setup of said printing device to a~~
~~modified default setup entered by said default setup input step; and~~
~~transmitting said printing job to said printing device.~~

12. (Currently Amended) A computer-readable medium storing a printing program for causing a printing device to execute:

~~receiving a printing job, wherein the printing job includes (a) a single default~~
~~setup command used for modifying multiple items of a default setup for the printing~~
~~device, (b) a print condition instruction used for executing the printing job, and (c)~~
~~test print image data including test print image data and a command;~~

~~analyzing whether the received printing job includes the single default setup~~
~~command included in said printing job;~~

modifying multiple items of a default setup to a modified multiple items of the default setup based on the single default setup command when the single default setup command is included in the printing job; and

~~a default setup to a modified default setup based on a default setup modifying command when said command is said default setup modifying command; and~~

printing the test print image data included in ~~[[said]]~~ the printing job according to the modified default setup.

13. (Cancelled).

14. (Currently Amended) The computer-readable medium storing a printing program on the computer-readable medium claimed in claim 12, wherein ~~[[said]]~~ the printing step additionally prints the contents of the default setup modified by said default setup modifying ~~[[step]]~~.

15. (Cancelled).

16. (Cancelled).

17. (Cancelled).

18. (New) The printing device claimed in claim 1, wherein the printing unit prints the test print image data according to the modified default setup.

19. (New) The printing device claimed in claim 1, wherein the printing unit prints additionally the contents of the default setup modified by said default setup modifying unit.

20. (New) The printing method claimed in claim 5, wherein the printing step prints the test print image data according to the modified default setup.

21. (New) A printing system comprising a printing device and a printing job transmission device, which are connected so as to communicate with each other; wherein

said printing job transmission device comprising:

a default setup inputting unit for inputting multiple contents (items) of a default setup for the printing device;

a printing job preparation unit for preparing a printing job including (a) a single default setup command used for modifying multiple contents (items) of the default setup for the printing device to multiple contents entered by the default setup inputting unit, (b) a print condition instruction used for executing the printing job, and (c) test print image data; and

a printing job transmission unit for transmitting the printing job to the printing unit; and

said printing device comprising;

a printing job receiving unit for receiving a printing job, wherein the printing job allows to including (a) the single default setup command used for modifying multiple contents (items) of the default setup for the printing device, (b) the print condition instruction used for executing the printing job, and (c) test print image data;

a command analyzing unit for analyzing whether the received printing job includes the singular default setup command;

a default setup modifying unit for modifying multiple contents (items) of a default setup to the modified multiple contents (items) of the default setup based on the single default setup command when the single default setup command is included in the printing job; and

a printing unit for printing the test print image data included in the printing job.

22. (New) The computer-readable medium storing a printing program claimed in claim 12, wherein the printing step prints the test print image data according to the modified default setup.
